Alkaline Phosphatase Assay

Figure 1 is a horizontal bar chart illustrating the fold change of gene expression in the placenta of patients with preeclampsia compared to normal pregnancy. The x-axis represents the 'Fold change' from -30 (Fold decrease) to 30 (Fold increase). The y-axis lists various genes. Bars extending to the left indicate downregulation, and bars extending to the right indicate upregulation. Some bars are labeled with their corresponding fold change values.
